Sculpture including leather, wood, and LED lighting

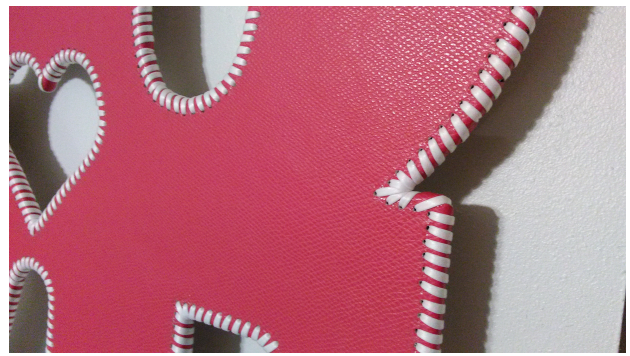

Diskette sculpture. Three disks that measured 2' x 2' each. From left to right: String Art, Leather (2 pieces painted), and Keyboard keys. All were created with the intention of hanging.

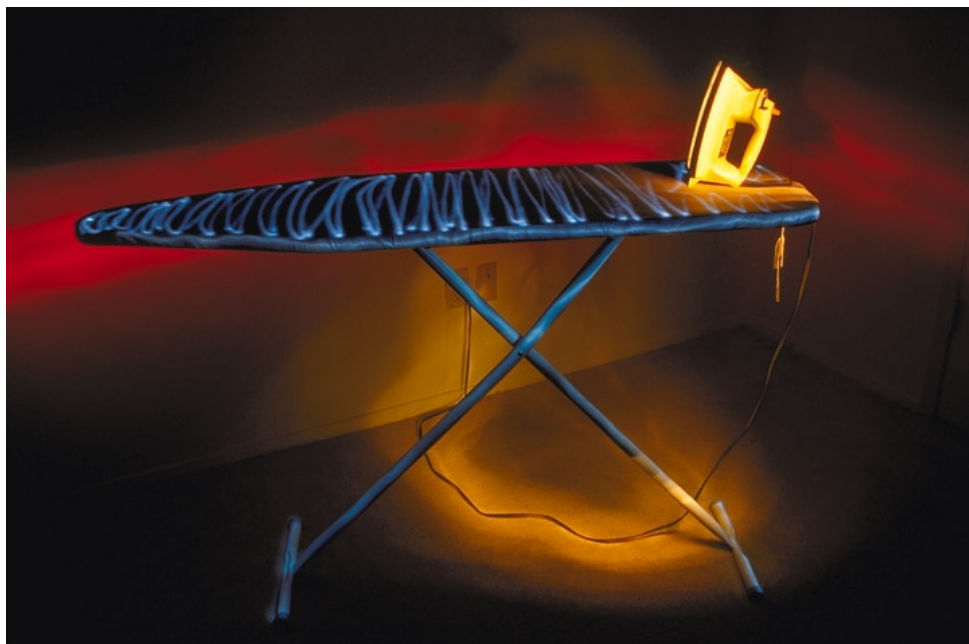

Framed Leather art that is cut, painted, and then reassembled. I first create the graphic in Illustrator, print, transfer to leather, and then cut. The right graphic is the Illustrator output. Both measured 8 1/2 x 11.

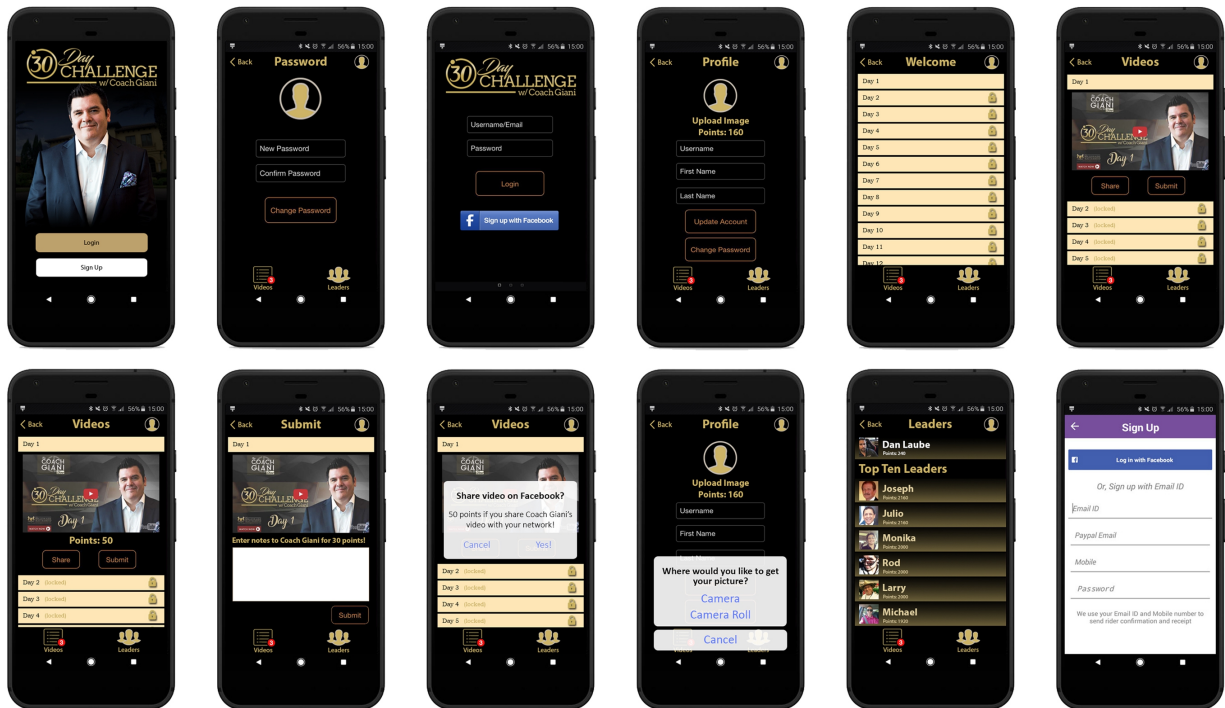

Pink leather with white stitching with added LED lighting. Mounted on 2' x 2' board.

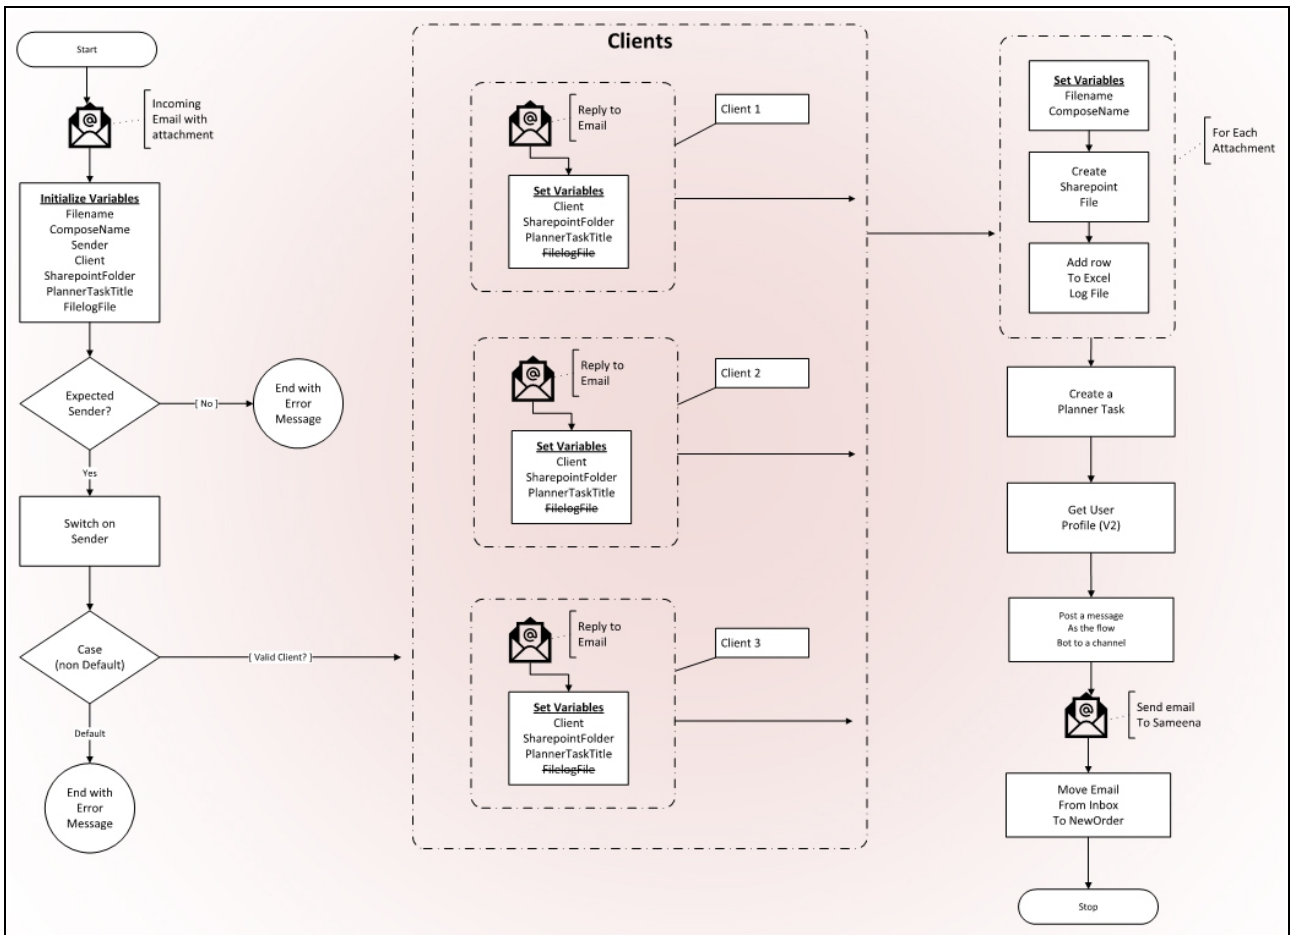

A sample of the type of art I was creating in the 90s. Long exposure in a completely dark room using flashlight to control the light. There color filters were used on the flashlight and also three exposures onto slide film. Photoshop was not used to create this photo. Other samples located at: [nightlight](#).

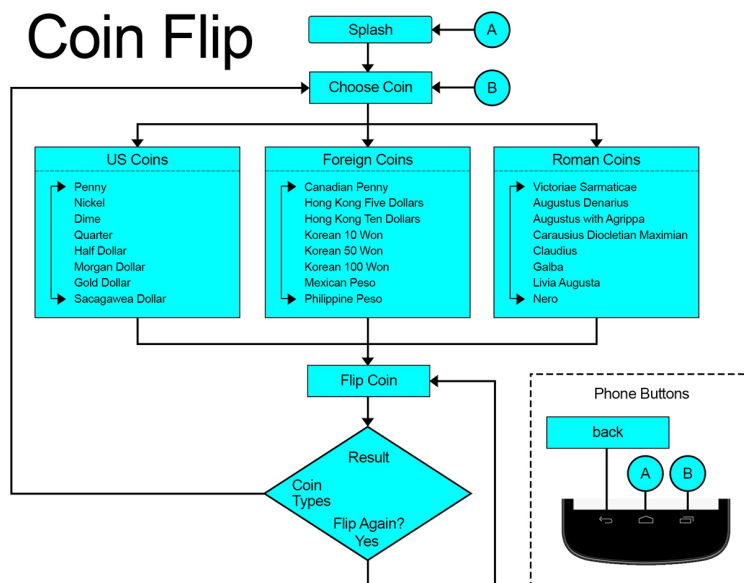

1520 Sedgwick Avenue Model. Known as the 'birthplace of hip-hop'. HO scale model using foam core, graphics created in Photoshop, and HO scale trees and people, etc. It has a built-in MP3 player which plays two songs through the incorporated speakers in the vent on the top of the building. The two songs are: Rappers Delight (considered the first commercially recorded Hip-Hop song) and Apache (the unofficial Hip-Hop national anthem). USB connections and battery compartment are also located on top. The dimensions of this piece are 20in(h) x 15in(w) x 3.5in(d).

30 Day Challenge UI phone app mockups. I created these mockups to indicate how the phone app would be displayed on a mobile phone platform.

PowerAutomate flowchart. I was tasked with creating a PowerAutomate flow that would monitor an incoming outlook mailbox for file attachments. The flow would download the attachment, reply to the sender, notify company employees, log the incoming file, save the file to a specific sharepoint folder, and create and assign a task. Although PowerAutomate does not create a flowchart, I created this flowchart in Adobe Photoshop.

Flowchart created for my Coin Flip app. This graphic and the app can viewed on my coin flip [page](#).

In app ads created for the BetterHuman App. I actually created all the app graphics and the graphics for the store. This app is still available on Android and Apple. I also created the DNA logo shown on the store websites: [Apple](#) and [Android](#).

#### Logo Design Samples

1-6: Sunscape Studios, 7: Personal Logo, 8-9: SmartFit (School project), 10: The Cut Pill (Illustrator), 11: Park Lane Agency (School project), 12-14: Metro Tool Rental (Animated Logos created in Adobe Flash).

Thank you for your time and I hope you consider me for this position.
